

### PRODUCT No. 110112

#### Container for collection of waste – 1100 l

(Illustrative photograph)

#### Technical data

|                                    |              |
|------------------------------------|--------------|
| Material                           | Steel sheet  |
| Material thickness (container/lid) | 1,5 / 1,5 mm |
| Capacity                           | 1100 l       |
| Weight                             | 135 kg       |
| Load capacity                      | 440 kg       |
| Width                              | 1370 mm      |
| Depth                              | 1080 mm      |
| Height                             | 1310 mm      |

#### Attributes

- Made of steel sheet. Surface finishing by hot-dip galvanizing. Manufactured according to EN 840-2.
- The container is welded with a continuous weld from the outside, it is not oil-tight.
- Reinforced wheel brackets (2 pcs).
- Suitable for collection, handling and sorting of domestic and industrial waste.
- Resistance against mechanical wearing is increased with pressed depressions.
- The lid is easily replaceable, hot-dip galvanized and obtained with blue varnish.
- The lid is equipped with locking in the opened state.
- Containers can be stacked which lowers expenses for transportation and storing.
- Discharge opening (D51 mm) for easy cleaning of interior space of container is placed in bottom and covered with black rubber cap.

#### Product purpose

- Designed for collection, handling and sorting of domestic and industrial waste.

#### Additions

- On order: central brake, lid lock, foot opening, comb rail, oil-tight design, adjustment for handling by the forklift, etc.
